

MM 3

RUSTON & HORNSBY 27/29hp DIESEL  
LOCOMOTIVE

The 'Ruston' locomotives were produced in many sizes, engine power and gauge. Widely used by industries of all kinds at home and overseas, perhaps 'THE' contractors locomotive. Our model is based on a loco that was at the APCM quarry at Rodmell. Nr Lewes in Sussex. The loco is now being restored at the Leighton Buzzard Narrow Gauge Railway as part of their extensive museum collection of narrow gauge motive power.

The kit is made from a combination of white metal castings and etched brass parts. Also provided are 009 couplings, chassis mounting nut and bolt. The kit is designed to fit an adapted Minitrix 0-6-0 chassis.
