

**MPM 26 WW 1 BRITISH WAR DEPT. LIGHT RAILWAYS  
'D' CLASS UNDERFRAME**

The 'D' class wagons were constructed by a variety of builders, the under frames of which were produced in steel channel or wood section. Apart from the 'D' class itself, the under frames were used to construct other vehicles such as the machinery and workshop trains and some special vehicles built by army units on the Western Front.

**For future release.**

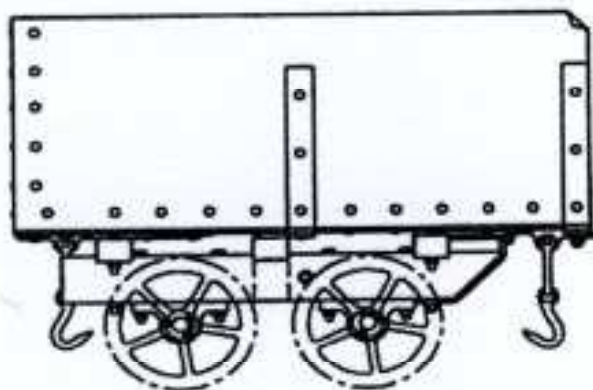

**MPM 26B** As for MPM 26 but supplied with WD Bogies.

**For future release.**

**THE QUARRY WORKSHOP RANGE  
7mm & 1/35th SCALE**

The Quarry Workshop Range of models of Welsh slate quarry wagons to 7mm scale. All are intended for 14mm gauge that accurately represents the nominal 2 foot gauge of the prototypes modelled. They can also be run on 16.5mm gauge with the use of spacing washers supplied in each kit. A unique back-to-back gauge is included with the kits to assist the builder. Two wagons in the range are also available in 1/35th scale for 16.5mm gauge.

Each of the wagons is of an actual vehicle, thoroughly researched to ensure faithful reproduction. All feature, where applicable, etched brass bodies and detail parts, white metal under frame parts and metal 'curly' spoked wheels. Scale coupling hooks, brass wire and full instructions included.
