

MAQUETTE a voie étroite

4mm Scale

The Maquette range is complementary to our own ranges of kits and is produced to a uniform 4mm scale. This is used for prototypes that are of 60cm gauge origin, further introductions to the range modelled on Metre gauge designs will be to 3.5mm H0m scale. All kits are supplied with instructions in the French language and include English building notes with fully detailed 'exploded' drawings.

LOCOMOTIVE BODY KITS USING 'N' SCALE CHASSIS

LT 01 BILLARD T75 DIESEL LOCO TRACTOR

Designed and built by Billard at Tour, these 4 wheel locos were used by the French military on the supply railways of the defensive Maginot Line in the late 1930's. With minor variations the locos were being built into the late 1960's and saw service on the French Army and Air Force bases until recently. Widely used by industry of all kinds and latterly by tourist lines, working locos may be seen throughout France.

A white metal kit containing 24 castings including a choice of industrial fittings, re-railing beams and shunters platforms. Detailed instructions with chassis modifications and suggested bodywork alterations. Designed to fit on Graham Farrish motor bogie 8129.
