

PARKSIDE DUNDAS

Festiniog Railway

The principal freight traffic on the Festiniog Railway was the carriage of finished slates from the quarries of Bleanau Festiniog to the port of Porthmadog. Specially designed slate wagons were provided for this traffic. The most common was the 2-Ton Steel Sided wagon of which there were approximately 117 braked wagons and 522 non-braked wagons.

DM24 Festiniog Railway 2-Ton Steel Sided Slate wagon

DM25 Festiniog Railway 2-Ton Steel Sided Slate Wagon (5)

Our kit which is available singly or in packs of 5 can be assembled into either the braked or non-braked versions. The kit contains plastic body and floor, curved spoke metal wheels and a choice of couplings. Chain link couplings are provided as is the standard OO9 type of coupling which has been designed to accept the wire loop from a BEMO OO9 Coupling (not supplied).
