

## PARKSIDE DUNDAS

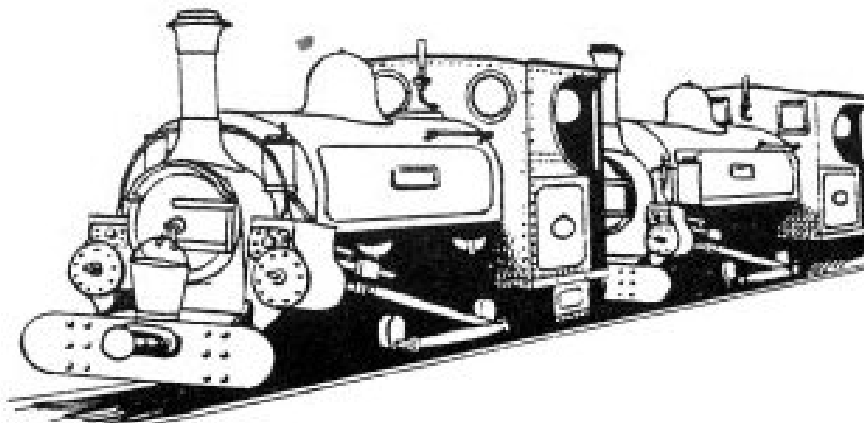

DLO3 Festiniog Railway 2-4-0 Loco 'Blanche' & Tender

0-4-0 Tank Loco 'Blanche' was built by The Hunslet Engine Company., Leeds in 1903 (Works No. 589) for the Penrhyn Quarry Railway in North Wales. This loco was designed for main-line service between the quarry and Port Penrhyn.

Purchased by The Festiniog Railway Company in 1963, 'Blanche' has been considerably modified over the years including the addition of a pony truck and tender, with the pony truck the loco rides much more steadily and has proved the ideal design for everyday service being economical on light trains, but capable of hauling heavy trains if traffic requires it.

Our kit features body parts highly detailed and cast in white metal, the cab is detailed and clear of motor. Also included is etched nickel silver valve gear, plastic tender chassis with metal wheels, detail wire and nuts & bolts etc.

Designed for use with the Ibertren 0-4-0 Steam Loco Chassis (not included).

DLO4 Penrhyn Railway 0-4-0 Tank Loco 'Linda'/'Blanche'/'Charles'

These loco's were designed for main-line service between the quarry and Port Penrhyn. Charles was built first and varied in minor details to the later engines, Linda and Blanche which can now be found in such modified form on the Festiniog Railway.

Our kit features highly detailed body parts cast in white metal, sufficient parts being included to build one loco only. The cab is detailed and clear of motor. Also included is etched nickel silver valve gear, detailing parts etc.

Designed for use with the Ibertren 0-4-0 Steam Loco Chassis (not included)
