Freelance 009 Narrow Gauge Kits

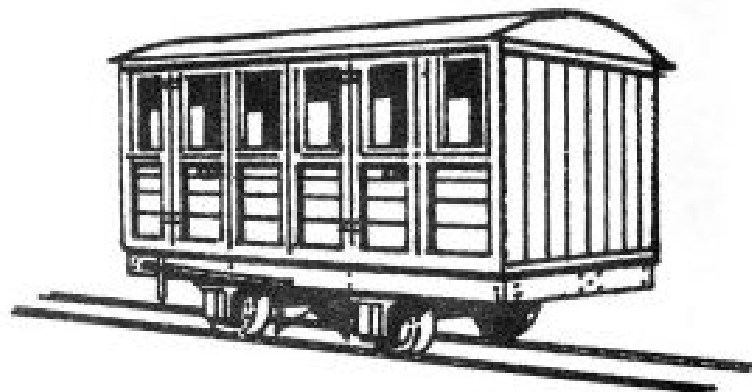

A range of 009 kits including all the parts required to make a complete model, excluding couplings. The kits are injection moulded in high impact plastic and some complete with wheels. We recommend using BEMO 009 couplings with our kits.

The rolling stock are freelance in that they are not modelled on wagons from any Narrow Gauge Railway, but are designed to look like the products of a small wagon works around the turn of the century.

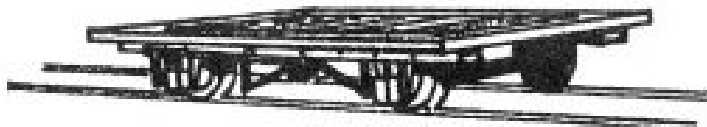

The chassis used in our kits is also available seperately and is ideal for the scratch builder when constructing Narrow Gauge rolling stock.

DM3 Brake Van

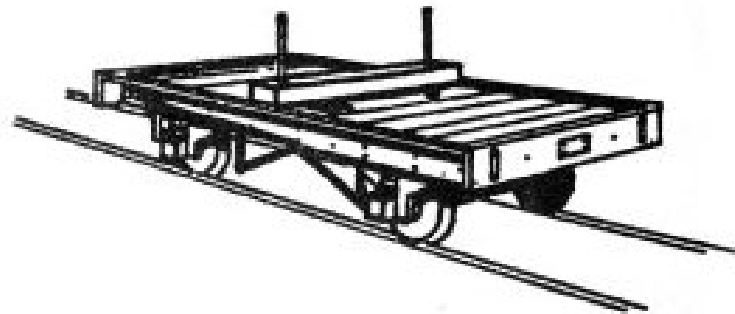

DM4 4-Wheel Coach
(INCLUDING SEATS)

DM5 4-Wheel Chassis

(Included with the kit is a plastic floor moulding giving the basis for a flat wagon.)

DM9 Single Bolster Wagon
(PAIR)

(The bolster can be made to swivel if required.)
