

## PARKSIDE DUNDAS

KITS  
NOW CONTAIN  
METAL WHEELS

### Vale of Rheidol Light Railway

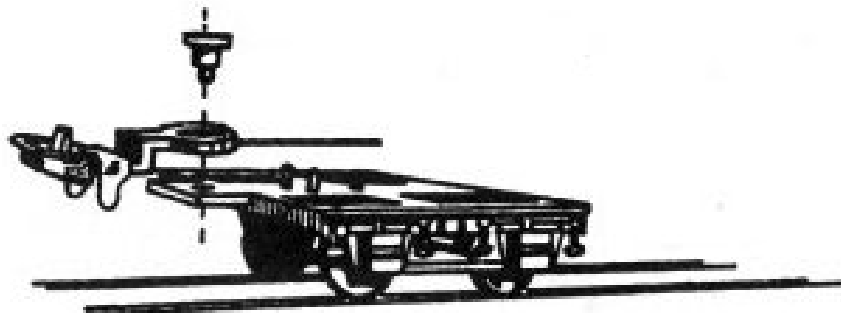

Twelve identical bogie coaches were built for the opening of the railway in 1902. All twelve when built were 7 compartment 3rd class coaches, however, as the need arose some were converted to other uses.

Our kit features the coach as originally built but is designed to be easily converted into Coaches No's 10 - 11 which were rebuilt as open 3rd class coaches.

### DM10 Vale of Rheidol 3rd Class Bogie Coach No's 1-12

The kit contains plastic body, seats, one-piece bogies, wheels and white metal vacuum & steam heating pipes etc. The instructions include prototype details. The kit does not contain couplings but the bogies are designed to use BEMO 009 couplings.

### DM11 Vale of Rheidol Coach Bogies (pair)

One pair of one-piece plastic bogies complete with wheels. The bogies are designed to use BEMO 009 couplings (not included).
